

Manulife Investment Asia-Pacific REIT Fund

Fund category

Fund-of-Funds

Fund objective

To provide long-term capital appreciation and sustainable income through a combined investment in other collective investment schemes, namely REITs and infrastructure funds/trusts.

Investor profile

The Fund is suitable for investors who wish to have investment exposure through a diversified portfolio of REITs and infrastructure funds/trusts within the Asia-Pacific region. The Fund may also appeal to investors who are seeking a sustainable distribution of income and long-term capital growth with a long-term investment horizon of 5 years or more.

[^] The S&P Pan Asia Ex-JP, AU, NZ, PK REIT 10% Capped Index (USD) is a customised index which consists of the REITs listed in Asia ex Japan, Australia, New Zealand and Pakistan. The index is a market capitalisation weighted index with a minimum market capitalisation of USD500 million with a single stock weight limit of 10%. The benchmark above is only used as a reference for investment performance comparison purpose. The risk profile of the Fund is different from the risk profile of this benchmark. The benchmark information and disclaimer of S&P Dow Jones Indices LLC are available in www.manulifeim.com.my/funds/Fund-Performance-Benchmark-Disclaimer.html

Note: The performance benchmark for the Fund is revised from Manulife Investment Asia REIT Ex Japan Index to S&P Pan Asia Ex-JP, AU, NZ, PK REIT 10% Capped Index (USD) effective from 1 August 2022. The purpose of the change is due to the discontinuation of Manulife Investment Asia REIT Ex Japan Index. The S&P Pan Asia Ex-JP, AU, NZ, PK REIT 10% Capped Index (USD) is used to better reflect the performance of the investment universe of the Fund.

July 2026
Factsheet

Manulife Investment Asia-Pacific REIT Fund

Market review

Asia REITs were largely flat in June as a more hawkish-than-expected tone from newly appointed U.S. Federal Reserve Chairman Kevin Warsh overshadowed improving geopolitical developments. Although the Federal Reserve left policy rates unchanged at its June meeting, updated FOMC projections indicated Members of Congress expect interest rates to remain elevated for longer than previously anticipated. The prospect of a prolonged restrictive rate environment weighed on investor sentiment for the asset class and largely offset the improvement in risk appetite arising from the easing of tensions in the Middle East.

Singapore REITs moved higher, lifted by positive returns in retail and healthcare REITs. These sectors are favoured for their defensive yields ahead of the 1HFY26 reporting season. Retail REITs benefited from expectations that lower energy costs could ease cost-of-living pressures and provide support for consumer spending. Retail sales are likely bolstered by the Singapore government's distribution of a new tranche of S\$500 Community Development Council (CDC) vouchers, with a significant portion earmarked for spending at participating supermarkets. Data-centric REITs underperformed, mirroring the recent weakness in AI/tech related sectors in the month.

Hong Kong REITs were the weakest-performing market in the region during June, weighed down by concerns over a potentially more restrictive U.S. interest rate outlook and tighter mainland Chinese controls on capital outflows into Hong Kong. Real estate sentiment remained fragile amid fears that investment inflows from China could slow meaningfully, potentially extending the recovery timeline for Hong Kong property markets. REITs with office exposure underperformed the more defensive retail sector.

Australia REITs moved higher. The sector outperformed the broader Australia equity market on lower government bond yields. As widely expected, the Reserve Bank of Australia left interest rates unchanged in June, reinforcing expectations that the current tightening cycle may be nearing its end. A domestically focused asset manager saw strong outperformance after it upgraded its FY26 earnings (for the third time) underpinned by growing funds under management. Despite 3 rate hikes YTD 2026, AREITs reported stable end of June valuations for their assets. Upward cap rate pressure has been manageable in retail and industrial, where CPI-linked lease income growth acts as a natural offset to higher funding costs.

Market outlook

Our outlook for Asia Pacific ex-Japan REITs remains constructive. We believe the risk of a renewed escalation between US and Iran should remain contained ahead of the US mid-term elections. The subsequent decline in crude oil prices toward pre-conflict levels should help ease inflationary pressures, although the pass-through to headline inflation is likely to take time. From a sector perspective, we expect improving dividend growth momentum as REITs continue to refinance legacy debt at lower funding costs, assuming benchmark rates remain broadly stable.

Fund review and strategy

The Fund underperformed the benchmark in June. Asset allocation decisions at the geographic level detracted from performance. Stock selection at the geographic and sector levels and asset allocation decisions at the sector level contributed to performance. The underweight to India REITs and no weight to Thai REITs were the primary detractors. Stock selection in Singapore data centre REITs and Hong Kong retail REITs, and the overweight to Australia diversified and retail REITs were the primary contributors.

Overall, we believe Asia Pacific ex-Japan REITs remain supported by sound property fundamentals, resilient balance sheets and a continued recovery in recurring distributions. Together with its attractive yield premium relative to other income-oriented assets, these factors underpin our favourable medium-term view on Asia Pacific ex-Japan REITs.

Based on the Fund's portfolio returns as at 31 May 2026 the Volatility Factor (VF) for the Fund is as indicated in the table above and are classified as in the table (source: Lipper). "Very High" includes Funds with VF that are above 16.460, "High" includes Funds with VF that are above 11.955 but not more than 16.460, "Moderate" includes Funds with VF that are above 8.735 but not more than 11.955, "Low" includes Funds with VF that are above 4.705 but not more than 8.735 and "Very Low" includes Funds with VF that are above 0.000 but not more than 4.705 (source:FiMM). The VF means there is a possibility for the Funds in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF for qualified Funds. VF and VC are subject to monthly revision or at any interval which may be prescribed by FiMM from time to time. The Fund's portfolio may have changed since this date and there is no guarantee that the Funds will continue to have the same VF or VC in the future. Presently, only Funds launched in the market for at least 36 months will display the VF and its VC.
