Manulife Investment-HW Flexi Fund

Market review

The FBM KLCI fell 1.1% MoM to 1,664 points in Jun 2026, marking its lowest monthly close YTD, weighed down by persistent foreign selling, regional technology weakness, geopolitical uncertainty surrounding the US-Iran conflict, and pre-election risk aversion ahead of the Johor and Negeri Sembilan state elections. Sentiment briefly improved following the signing of the US-Iran peace agreement on 18 Jun, although concerns over the durability of the deal resurfaced later in the month. Domestically, sentiment was supported by the launch of the MY Value Up Guidebook and Malaysia's rise to 15th place in the 2026 IMD World Competitiveness Ranking, while economic data stayed resilient, with stronger industrial production, exports, and wholesale and retail trade growth, alongside inflation remaining contained at 2.0%. Market liquidity softened during the month, with average daily trading value (ADTV) easing to RM3.0bn from RM3.8bn in May following the completion of the MSCI index rebalancing.

Foreign investors remained net sellers in Jun 2026, recording net outflows of RM2,382m, representing a 36.2% decline from RM3,731m in May, but still marking the second-largest monthly net sell of 2026. As a result, foreign shareholding by market capitalisation declined to a record low of 18.3% in June from 18.6% in May. Proprietary investors were the second-largest net sellers, with net outflows of RM130m. In contrast, local institutional investors were the largest net buyers, with net inflows of RM2,059m, followed by local retail investors with net inflows of RM453m. For 1H26, local institutional investors remained the largest net buyers, recording cumulative net inflows of RM2,897m, followed by proprietary investors at RM633m. Foreign investors were the largest net sellers, with cumulative net outflows of RM3,130m, while local retail investors recorded net outflows of RM400m.

Malaysia's KLCI was the second-worst-performing index among the MIST markets in Jun 2026, declining 1.1% MoM. It underperformed Singapore's STI (+2.6% MoM) and Thailand's SET (+1.5% MoM), but outperformed Indonesia's JCI (-7.9% MoM). The KLCI outperformed the MSCI All Country ex-Japan Index, which fell 1.5% MoM in Jun 2026. On a 1H26 basis, Thailand's SET was the best performer with a 26.3% gain, followed by Singapore's STI (+11.3%) and Malaysia's KLCI (-1.0%). Indonesia's JCI was the weakest performer, falling 34.7% over the same period. Overall, the MIST markets underperformed the MSCI All Country ex-Japan Index, which rose 25.2% in 1H26.

Sector performance in Jun 2026 was led by the plantation (+4.2%), construction (+1.7%), and consumer (+1.1%) sectors, while property (-10.1%), healthcare (-9.9%), and industrial products (-8.7%) sectors were the worst performers. Among FBM KLCI constituents, the top gainers were 99 Speed Mart, Petronas Dagangan, and IOI Corp, while Petronas Chemicals, Press Metal, and CelcomDigi were the biggest laggards.

Key events to watch in Jul 2026 include the Johor state election (11 Jul), the Negeri Sembilan state election (1 Aug), and developments from the Second Meeting of the Fifth Session of the 15th Parliament (22 Jun–16 Jul). Investors will also monitor the Monetary Policy Committee's policy decision (9 Jul), May Industrial Production Index (IPI) data (9 Jul), the advance 2Q26 GDP estimate (17 Jul), and June CPI (17 Jul).

On the economic front, 1) Malaysia's exports continue to sustain its strong momentum, recording another all-time high of 45.3% after a strong 36.9% increase in April, driven by higher shipments of Electrical & Electronic (E&E), artificial intelligence & automotive electronics, alongside petroleum products and optical & scientific equipment; 2) April 2026 IPI gained 8.2% y-o-y, jumping from 3.1% in the previous month. ; 3) May 2026 headline inflation rate came in higher m-o-m at +2.0% y-o-y (April: +1.9% y-o-y) as core inflation remain similarly higher at +2.0% y-o-y.; 4) BNM's international reserves increased by USD0.0B to US\$130.6bn as at end-May vs a month ago. The reserves position is sufficient to finance 4.6 months of retained imports and is 0.9 times the short-term external debt.

In corporate developments, 1) IJM Corporation Bhd is selling a hypermarket building in Sandakan, Sabah, to its tenant, supermarket operator Econsave for RM47.5m. 2) The family of Public Bank Bhd founder has begun reducing its stake in the bank through its first restricted offer for sale of shares to directors and employees, disposing 250.9m shares on June 9. 3) AMMB Holdings Bhd is acquiring Menara AmBank, its corporate headquarters on Jalan Yap Kwan Seng, from AmFIRST REIT for RM331m cash in a related-party transaction.

4) AirAsia X Bhd has fallen behind on payments to suppliers and asked for deferrals on at least a dozen planes, after higher fuel prices strained the low-cost carrier's finances. 5) IOI Properties Group Bhd will rejoin the FBM KLCI as a constituent, while Sime Darby Bhd is being removed as a member of the 30-stock index following a semi-annual review.

In the US, the four-week moving average of claims, considered a better measure of labour market trends as it strips out week-to-week volatility, came in at 222,000 for the week ended 27th June 2026, slightly lower vs previous week's figure of 224,500. Unemployment rate for June came in slightly lower m-o-m at 4.2%. Meanwhile, the US manufacturing sector decreased marginally in June 2026, with the seasonally adjusted Markit U.S Manufacturing Purchasing Manager's Index™ (PMI™) registering at 53.9, decreasing 1.2 points from the previous months' reading of 55.1. US consumer confidence however, improved to 49.5 in June, higher than the 44.8 recorded in May. Headline inflation rate increased m-o-m at +4.2% in May 2026. Core inflation, which strips out food and energy costs, ticked up to +2.9% in May, slightly higher than the +2.8% recorded in the previous month.

In the Eurozone, Inflation rate came in at +2.8% in June 2026, declining lower m-o-m vs previous reading of +3.2%. Industrial production in the Euro Area came in +0.3% from a year earlier in April 2025, improving from -2.8% for the previous month. The conditions in the Eurozone manufacturing sector decreased slightly in June, after an industry survey confirmed that the bloc's Manufacturing Purchasing Manager's Index (PMI), a broad gauge of industry activity, stood at 51.4 in June 2026 (vs 51.6 in May 2026).

Market outlook

The FBM KLCI fell 1.1% in June to close at 1,664 points, as gains in the first half of the month were erased by a late-month sell-off driven by regional technology weakness, geopolitical uncertainty and pre-election risk aversion. Foreign investors remained net sellers throughout the month, although selling pressure eased intermittently, while domestic institutions provided support through bargain hunting. Market sentiment was shaped by developments in the Middle East, the dissolution of the Johor and Negeri Sembilan state assemblies, and the launch of the MY Value Up Guidebook. Optimism following the US-Iran peace agreement briefly lifted markets but concerns over its durability later triggered renewed risk off sentiment, particularly in technology stocks. Petronas Chemicals and Press Metal recorded significant price retracement due to falling crude oil and aluminium prices following the signing of the US-Iran peace deal. Market liquidity also softened, with average daily trading value (ADTV) easing to RM3bn in Jun 2026 from RM3.8bn in May following the completion of the MSCI index rebalancing. Sector performance was mixed, with five sectors posting positive gains in Jun 2026. Average daily trading value (ADTV) declined to RM3.0bn in Jun from RM3.8bn in May.

Malaysia's KLCI was the second-worst-performing index among the MIST markets in Jun 2026, declining 1.1% MoM. It underperformed Singapore's STI (+2.6% MoM) and Thailand's SET (+1.5% MoM), but outperformed Indonesia's JCI (-7.9% MoM). The KLCI outperformed the MSCI All Country ex-Japan Index, which fell 1.5% MoM in Jun 2026. On a 1H26 basis, Thailand's SET was the best performer with a 26.3% gain, followed by Singapore's STI (+11.3%) and Malaysia's KLCI (-1.0%). Indonesia's JCI was the weakest performer, falling 34.7% over the same period. Overall, the MIST markets underperformed the MSCI All Country ex-Japan Index, which rose 25.2% in 1H26.

July 2026
Factsheet

Manulife Investment-HW Flexi Fund

Foreign investors remained net sellers of Malaysian equities in Jun 2026, recording net outflows of RM2,382m and bringing cumulative 1H26 net foreign outflows to RM3,130m. Selling was concentrated in the financial services, healthcare, and consumer sectors, with Maybank, CIMB, and IHH Healthcare among the top net sells. Local institutional investors were net buyers for the second consecutive month, with net inflows of RM2,059m in June (down 30% MoM), lifting cumulative 1H26 net inflows to RM2,897m. Buying was focused on the financial services, healthcare and telecommunications sectors, led by Maybank, CIMB, and IHH Healthcare. Meanwhile, local retail investors remained net buyers, recording net inflows of RM453m in Jun 2026 (-24% MoM), reducing their cumulative 1H26 net sell position to RM400m. Their purchases were concentrated in the financial services and consumer sectors, with Maybank, CIMB, and Genting among their top net buys. Proprietary investors turned net sellers, recording net outflows of RM130m in Jun 2026 versus net inflows of RM205m in May, although they remained net buyers of RM633m in 1H26. Selling was mainly concentrated in the consumer and industrial sectors, led by Zetrix, Mega First, and Nestlé Malaysia.

The plantation, construction, and consumer sectors were the top-performing sectors in Jun 2026, while industrial production, healthcare, and property lagged. Among KLCI constituents, the top gainers were 99 Speed Mart (+7% MoM), Petronas Dagangan (+6.5%), and IOI Corp (+5.8%). Meanwhile, the biggest laggards were Petronas Chemicals (-22.3%), Press Metal (-14.7%), and CelcomDigi (-12.5%).

In July 2026, investors' attention will be on:

1. Economy – Investors will monitor the Monetary Policy Committee's policy decision (9th July), May Industrial Production Index (IPI), Advanced 2Q26 GDP estimates & June CPI (17th July).
2. Corporates – Also in focus will be the developments from the Second Meeting Of The Fifth Session of the 15th Parliament on Monday (22 Jun–16 Jul).
3. Global – Globally, focus will remain on developments surrounding the US-Iran peace deal, as any breakdown could push oil prices higher, as well as on the US FOMC meeting (28–29 Jul) for signals on interest rates and implications for the ringgit.
4. Politics – Johor state election (11 July) & Negeri Sembilan state elections (1 Aug). Markets will also watch for any developments regarding a potential Melaka state election and the timing of the next general election.

Fund review and strategy

Market sentiment was muted in June due to political distraction. With state elections on the horizon and growing expectation for general election to be held before end of term, political uncertainty will keep market in risk off mode.

On top of that, market was pricing in a more hawkish Fed, which will potentially stop the positive momentum for Ringgit. We will continue to monitor inflation data closely and decide if the transitory view still holds.

For the portfolio, we will continue to maintain defensive positioning and focus on quality large cap space.

Based on the Fund's portfolio returns as at 31 May 2026 the Volatility Factor (VF) for the Fund is as indicated in the table above and are classified as in the table (source: Lipper). "Very High" includes Funds with VF that are above 16.460, "High" includes Funds with VF that are above 11.955 but not more than 16.460, "Moderate" includes Funds with VF that are above 8.735 but not more than 11.955, "Low" includes Funds with VF that are above 4.705 but not more than 8.735 and "Very Low" includes Funds with VF that are above 0.000 but not more than 4.705 (source:FIMM). The VF means there is a possibility for the Funds in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF for qualified Funds. VF and VC are subject to monthly revision or at any interval which may be prescribed by FIMM from time to time. The Fund's portfolio may have changed since this date and there is no guarantee that the Funds will continue to have the same VF or VC in the future. Presently, only Funds launched in the market for at least 36 months will display the VF and its VC.
