Factsheet

Manulife Investment U.S. Equity Fund

Market review

Major U.S. stock indexes delivered a solid gain and set fresh record highs in May, fueled by strong corporate earnings, enthusiasm surrounding artificial intelligence investments, a resilient economy and easing investor concern about inflation and interest rates. Within the broad-based S&P 500 Index, the AI-fueled information technology sector was the best-performing sector with a double-digit gain, while the energy sector was the worst-performing sector as oil prices softened.

Market outlook

Looking ahead, we see several factors we believe can drive improved relative performance for the portfolio. Even after gaining ground in May, some of our holdings still trade at valuations that, in our view, reflect an overly pessimistic outlook that our analysis just does not support. For many of these companies, we believe steady execution alone should be sufficient to unlock multiple expansion. Encouragingly, in May we began to see early signs of inflection in both software, as AI-driven revenues became tangible, and healthcare, as fears around cost inflation begin to moderate. Against this backdrop, we believe the environment increasingly will favor stock selection based on company-specific fundamentals and support our disciplined, bottom-up research-driven approach.

Feeder fund review

In May, the Feeder Fund posted a) 3.44% versus the benchmark return of 5.15% for its USD class; b) 3.29% versus the benchmark return of 4.97% for its RM class; and c) 3.27% versus the benchmark return of 5.15% for its RM-Hedged class. Security selection in the information technology group accounted for most of the fund's underperformance versus the S&P 500 Index this period. By contrast, the fund's underweights in the consumer staples, industrials and utilities sectors contributed to relative performance. The Feeder Fund will continue to be fully invested into the Target Fund. We rebalance the Feeder Fund when the invested level is affected by market volatilities, inflows and outflows of the Feeder Fund. We aim to maintain a target allocation of around 95%-98%.

Based on the Fund's portfolio returns as at 30 Apr 2026 the Volatility Factor (VF) for the Fund is as indicated in the table above and are classified as in the table (source: Lipper). "Very High" includes Funds with VF that are above 15.965, "High" includes Funds with VF that are above 11.775 but not more than 15.965, "Moderate" includes Funds with VF that are above 8.585 but not more than 11.775, "Low" includes Funds with VF that are above 4.635 but not more than 8.585 and "Very Low" includes Funds with VF that are above 0.000 but not more than 4.635 (source:FiMM). The VF means there is a possibility for the Funds in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF for qualified Funds. VF and VC are subject to monthly revision or at any interval which may be prescribed by FIMM from time to time. The Fund's portfolio may have changed since this date and there is no guarantee that the Funds will continue to have the same VF or VC in the future. Presently, only Funds launched in the market for at least 36 months will display the VF and its VC.

The above information has not been reviewed by the SC and is subject to the relevant warning, disclaimer, qualification or terms and conditions stated herein. Investors are advised to read and understand the contents of the Master Prospectus dated 15 May 2023 and its First Supplemental Master Prospectus dated 20 October 2023 and its Second Supplemental Master Prospectus dated 12 February 2025 and its Third Supplemental Master Prospectus dated 3 June 2025 and its Fourth Supplemental Master Prospectus dated 30 June 2025 and all the respective Product Highlights Sheet(s) (collectively, the "Offering Documents"), obtainable at our offices or website, before investing. The Offering Documents have been registered with the Securities Commission Malaysia (SC), however the registration with the SC does not amount to nor indicate that the SC has recommended or endorsed the product. Where a unit split/distribution is declared, investors are advised that following the issue of additional units/distribution, the NAV per unit will be reduced from the pre-unit split NAV/cum-distribution NAV to post-unit split NAV/ex-distribution NAV; and where a unit split is declared, the value of your investment in the Fund's denominated currency will remained unchanged after the distribution of the additional units. Past performances are not an indication of future performances. There are risks involved with investing in unit trust funds; wholesale funds and/or Private Retirement Schemes. Some of these risks associated with investments in unit trust funds; wholesale funds and/or Private Retirement Schemes are interest rate fluctuation risk, foreign exchange or currency risk, country risk, political risk, credit risk, non-compliance risk, counterparty risk, target fund manager risk, liquidity risk and interest rate risk. For further details on the risk profile of all the funds, please refer to the Risk Factors section in the Offering Documents. The price of units and income distribution may go down as well as up. Investors should compare and consider the fees, charges and costs involved. Investors are advised to conduct own risk assessment and consult the professional advisers if in doubt on the action to be taken.
