June 2026
Factsheet

Manulife Global Low Volatility Equity Fund

Market review

- Global equities, as measured by the MSCI World Index, rose 4.55% in May, bringing the year-to-date return to 10.49%, in US-dollar terms.
- Global equity markets gained in May, driven almost entirely by technology stocks as investors looked past surging inflationary pressures and ongoing uncertainty around geopolitical developments in Iran.
- The ongoing tech rally helped US equities outperform other developed markets while also boosting emerging markets across Asia.
- Sector performance within the MSCI World was mixed to positive during May, led by technology and materials. Energy and utilities declined the most during the month.

Market outlook

- Quality stocks have had their worst performance in many years, while speculative growth has delivered its best performance. Historically, the Portfolio and quality have outperformed following speculative growth-led rallies and periods of quality underperformance.
- We believe the quality companies we own in our Portfolio will smooth the impact of AI risks, capturing much of the upside of the AI investment cycle by avoiding speculative growth companies, while mitigating the downside risk of AI disruption across many industries.
- Our Portfolio is invested in quality business models, which we believe are resilient or can monetize generative AI. We believe that companies with proprietary data embedded in enterprise work flows that are monetizing AI have been oversold.
- We have successfully navigated through technological disruptions before. We have demonstrated skill in identifying winners and losers in the face of technological disruption.
- Our Portfolio has been here before, both in terms of the market environment and identifying winners from losers in the face of disruption. Our Portfolio and process have historically delivered stronger performance after these periods of quality headwinds driven by speculative growth.

Feeder fund review

In May, the Feeder Fund posted a) 1.56% versus the benchmark return of 4.37% for its A (USD) class; and b) 1.44% versus the benchmark return of 4.37% for its A (RM-Hedged) class. The Feeder Fund will continue to be fully invested into the Target Fund. We rebalance the Feeder Fund when the invested level is affected by market volatilities, inflows and outflows of the Feeder Fund. We aim to maintain a target allocation of around 95%-98%.

Based on the Fund's portfolio returns as at 30 Apr 2026 the Volatility Factor (VF) for the Fund is as indicated in the table above and are classified as in the table (source: Lipper). "Very High" includes Funds with VF that are above 15.965, "High" includes Funds with VF that are above 11.775 but not more than 15.965, "Moderate" includes Funds with VF that are above 8.585 but not more than 11.775, "Low" includes Funds with VF that are above 4.635 but not more than 8.585 and "Very Low" includes Funds with VF that are above 0.000 but not more than 4.635 (source: FiMM). The VF means there is a possibility for the Funds in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF for qualified Funds. VF and VC are subject to monthly revision or at any interval which may be prescribed by FIMM from time to time. The Fund's portfolio may have changed since this date and there is no guarantee that the Funds will continue to have the same VF or VC in the future. Presently, only Funds launched in the market for at least 36 months will display the VF and its VC.

The above information has not been reviewed by the SC and is subject to the relevant warning, disclaimer, qualification or terms and conditions stated herein. Investors are advised to read and understand the contents of the Master Prospectus dated 15 May 2023 and its First Supplemental Master Prospectus dated 20 October 2023 and its Second Supplemental Master Prospectus dated 12 February 2025 and its Third Supplemental Master Prospectus dated 3 June 2025 and its Fourth Supplemental Master Prospectus dated 30 June 2025 and all the respective Product Highlights Sheet(s) (collectively, the "Offering Documents"), obtainable at our offices or website, before investing. The Offering Documents have been registered with the Securities Commission Malaysia (SC), however the registration with the SC does not amount to nor indicate that the SC has recommended or endorsed the product. Where a unit split/distribution is declared, investors are advised that following the issue of additional units/distribution, the NAV per unit will be reduced from the pre-unit split NAV/cum-distribution NAV to post-unit split NAV/ex-distribution NAV; and where a unit split is declared, the value of your investment in the Fund's denominated currency will remain unchanged after the distribution of the additional units. Past performances are not an indication of future performances. There are risks involved with investing in unit trust funds; wholesale funds and/or Private Retirement Schemes. Some of these risks associated with investments in unit trust funds; wholesale funds and/or Private Retirement Schemes are interest rate fluctuation risk, foreign exchange or currency risk, country risk, political risk, credit risk, non-compliance risk, counterparty risk, target fund manager risk, liquidity risk and interest rate risk. For further details on the risk profile of all the funds, please refer to the Risk Factors section in the Offering Documents. The price of units and income distribution may go down as well as up. Investors should compare and consider the fees, charges and costs involved. Investors are advised to conduct own risk assessment and consult the professional advisers if in doubt on the action to be taken.
