June 2026
Factsheet

Manulife Global Perspective Fund

Market review

Global equities advanced, supported by hopes of an extension to the fragile US-Iran ceasefire and the reopening of the Strait of Hormuz. The US led developed markets higher, further buoyed by strength in AI stocks, strong corporate earnings, and domestic economic resilience. European stocks lagged as rising headline eurozone inflation and declining private-sector activity weighed. Chinese equities slid amid domestic growth worries. Crude oil prices sank on rising Middle East peace hopes. May CBOE Volatility Index (VIX) futures fell 9.7% month on month to 17.6 (readings below 20 are generally viewed as indicative of market stability).

MSCI All Country World Index (ACWI) sector returns were mixed, with information technology leading by a wide margin, followed by consumer discretionary and materials. In contrast, energy, utilities, and consumer staples lagged the most, delivering negative returns.

Market outlook

Equity markets in recent months have been characterized less by a steady broadening of leadership and more by periodic, extreme style- and factor-driven rotations. Portfolio managers view this as reflective of an early and unsettled phase of a new economic and market regime, rather than a mature leadership transition. Looking ahead, we continue to believe that equity market leadership is likely to broaden over the next economic and market cycle, underpinned by a shifting macroeconomic backdrop and ongoing geopolitical realignment, including the US moving away from the free-trade framework that has long supported globalization and global stability.

While AI is one of the most transformative technological developments of this decade with broad investment implications across sectors, portfolio managers recognize it will take time for companies to incorporate this new technology into their operations and business models. As a result, portfolio managers remain balanced in assessing the true addressable market. They are not only focused on firms involved in AI infrastructure but also companies that are able to embed AI into their products and services meaningfully.

The global economy is also experiencing a rare confluence of major structural changes in addition to AI, which could drive earnings growth across a wider range of companies. These structural changes include innovation in health care, an industrial renaissance, and changing patterns of the global consumer that could set the stage for a multi-year capital expenditure supercycle. The portfolio was designed for such an environment – identifying companies that are well positioned to benefit from new and evolving long-term trends.

Feeder fund review

In May, the Feeder Fund posted a) 4.61% versus the benchmark return of 5.16% for its A (USD) class; b) 4.50% versus the benchmark return of 5.16% for its A (RM-Hedged) class; and c) 4.35% versus the benchmark return of 5.16% for its A (SGD-Hedged) class. The Feeder Fund will continue to be fully invested into the Target Fund. We rebalance the Feeder Fund when the invested level is affected by market volatilities, inflows and outflows of the Feeder Fund. We aim to maintain a target allocation of around 95%-98%.

The above information has not been reviewed by the SC and is subject to the relevant warning, disclaimer, qualification or terms and conditions stated herein. Investors are advised to read and understand the contents of the Prospectus dated 3 October 2023 and all the respective Product Highlights Sheet(s) (collectively, the "Offering Documents"), obtainable at our offices or website, before investing. The Offering Documents have been registered with the Securities Commission Malaysia (SC), however the registration with the SC does not amount to nor indicate that the SC has recommended or endorsed the product. Where a unit split/distribution is declared, investors are advised that following the issue of additional units/distribution, the NAV per unit will be reduced from the pre-unit split NAV/cum-distribution NAV to post-unit split NAV/ex-distribution NAV; and where a unit split is declared, the value of your investment in the Fund's denominated currency will remain unchanged after the distribution of the additional units. Past performances are not an indication of future performances. There are risks involved with investing in unit trust funds; wholesale funds and/or Private Retirement Schemes. Some of these risks associated with investments in unit trust funds; wholesale funds and/or Private Retirement Schemes are interest rate fluctuation risk, foreign exchange or currency risk, country risk, political risk, credit risk, non-compliance risk, counterparty risk, target fund manager risk, liquidity risk and interest rate risk. For further details on the risk profile of all the funds, please refer to the Risk Factors section in the Offering Documents. The price of units and income distribution may go down as well as up. Investors should compare and consider the fees, charges and costs involved. Investors are advised to conduct own risk assessment and consult the professional advisers if in doubt on the action to be taken.
